CORRUGATED BOX MAKING MACHINES

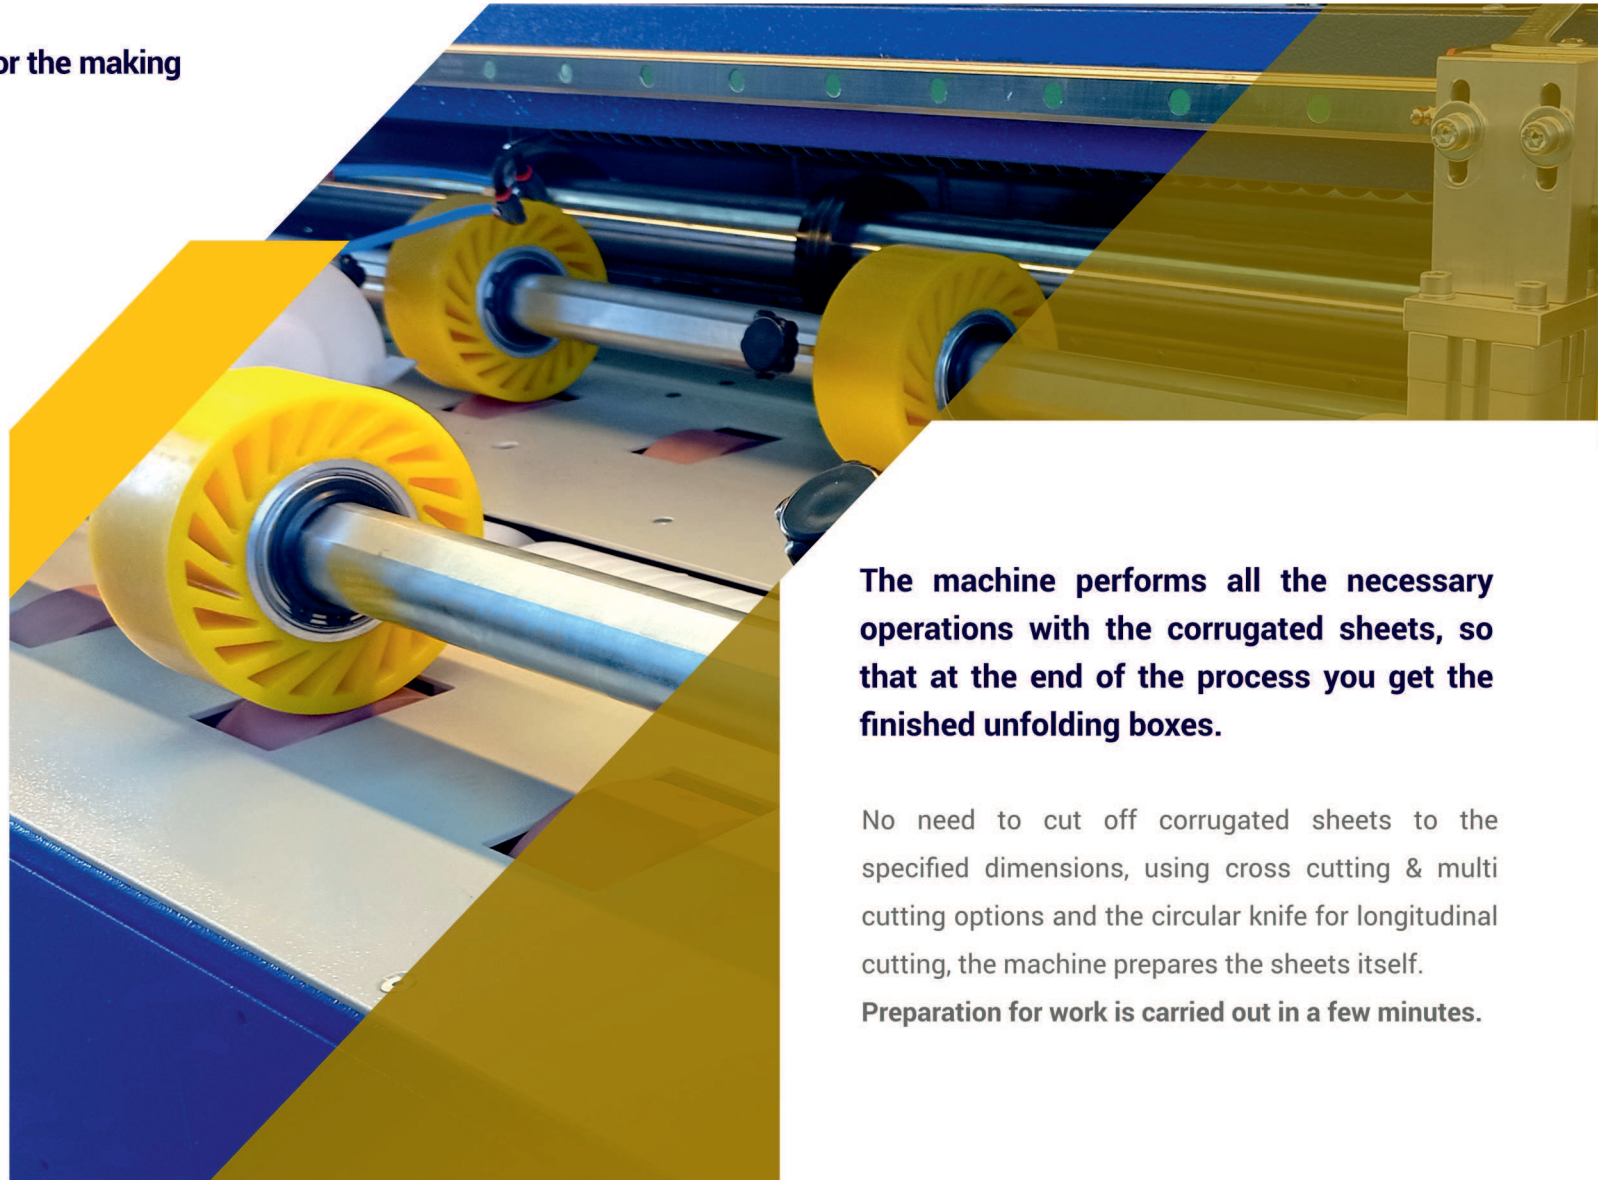

WE MANUFACTURE MACHINES  
MAKING CORRUGATED BOXES

# BOX MAKING MACHINE

## ► BOXMAKER

**Boxmaker is a machine designed for the making of different corrugated boxes.**

The machine is quickly and easy to set up, convenient to operate and characterized by very fast and precise work as well as the possibility of prompt setting for the new order. It is possible to manufacture over 50 styles of the products according to FEFCO, starting from box 0200, including 0300 and 0400 ranges, pallet boxes, trays, partitions and more.

**The machine performs all the necessary operations with the corrugated sheets, so that at the end of the process you get the finished unfolding boxes.**

No need to cut off corrugated sheets to the specified dimensions, using cross cutting & multi cutting options and the circular knife for longitudinal cutting, the machine prepares the sheets itself.

**Preparation for work is carried out in a few minutes.**

Working width	1400 ÷ 2600mm
Working length	unlimited
Productivity	around 800 boxes/hour
Memory boxes	1000
Segments slotting knives	600mm
Install power (depends of the model)	2 ÷ 7,5kW
Voltage	3x380V
Easy set up	√

Scoring wheels (incl. in basic)	√
Circular knife (incl. in basic)	√
Cross cutting - option	√
Servo drives - option	√
Multi cutting - option	√
Die-cutting - option	√
Printing - option	√
Gluing - option	√

“ *Product quality and customer satisfaction are the main goals and lasting commitment of PAK-PROJEKT. A satisfied customer is our greatest success.* ”

# ADDITIONAL UNITS

Standard boxes on the machine are made in one pass. Additional units expand technological possibilities - more styles of FEFCO can be manufactured.

1

## Die-cutting

This option allows the production of a box that has openings or handles. It is possible to install several such cutting tools on the machine.

2

## Cross cutting

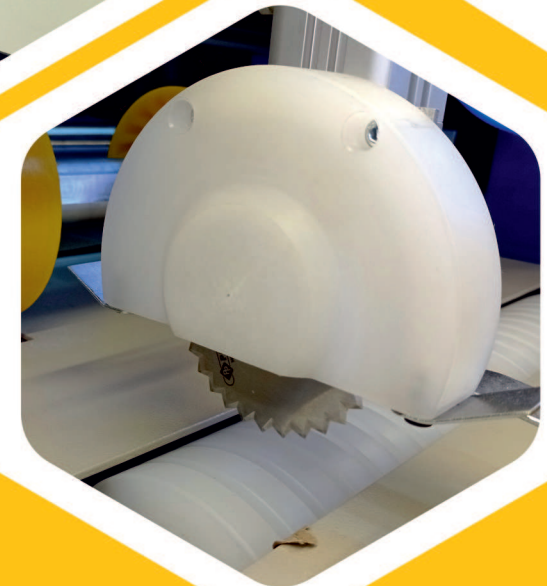

This option allows you to cut sheet to the desired length.

3

## Multi cutting

This option for longitudinal cutting, FEFCO 0204, 206 & 0400 range and forming connecting flap.

4

## Printing unit

Features:

- One color
- Print area 200x500mm
- Water-based paint
- Two rubber rollers

5

## Table feeding

Automatic feeding by the gripper from the bottom of the stack with the blanks.

6

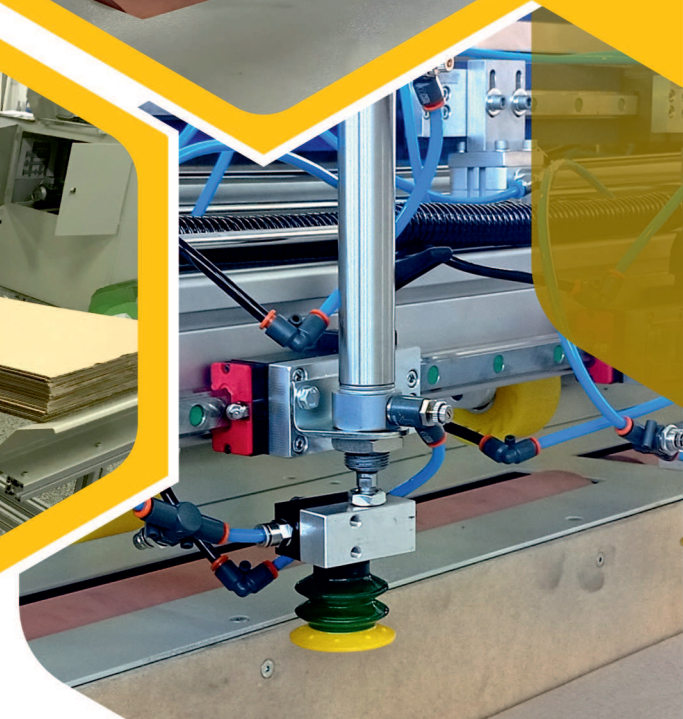

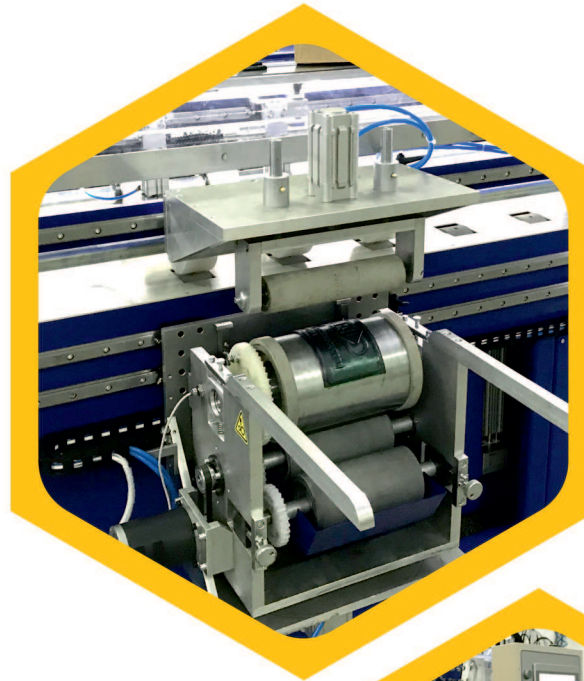

## Vacuum feeding

Vacuum automatic feeding gripping from the top of the stack with the blanks.

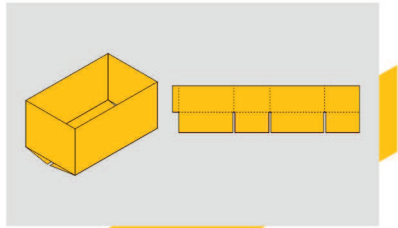

7

## Glue unit

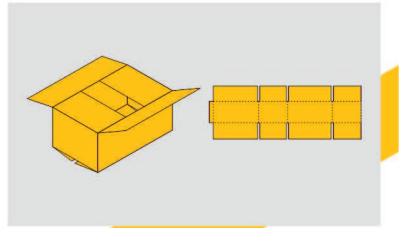

With the glue application, which is integrated on the machine, we apply cold glue in the same cycle of box production. With this application, we save time and streamlining the box production cycle. Especially helpful with the production of large boxes.
